EV program customers\*  
**6,375**

\*statewide residential enrollments

Residential customers electric  
**3,417**

**CARBON EMISSIONS**  
(metric tons CO<sub>2</sub>)

## LEADING THE CLEAN ENERGY TRANSITION

Xcel Energy was the first U.S. energy provider to set aggressive carbon reduction goals for all the ways our customers use energy—electricity, heating and transportation. These three goals position Xcel Energy to be a net-zero energy provider by 2050.

**100% Carbon-Free Electricity**

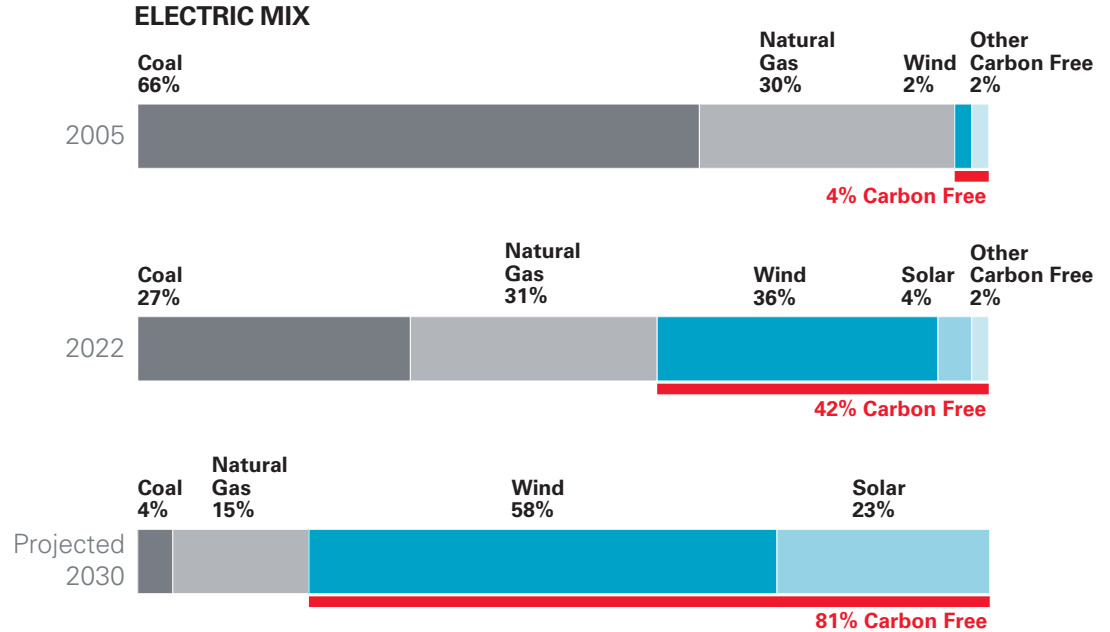

**Net-Zero Natural Gas**

**Zero-Carbon Transportation**

## COLORADO'S CLEAN ENERGY PLAN

The Colorado Clean Energy Plan will reduce carbon emissions at least 85% by 2030 from 2005 levels, end the use of coal by 2030 and add unprecedented amounts of renewable energy resources. By the end of 2022, we reduced emissions by 51% from 2005 levels. Approximately 80% of customers' electricity will come from renewable sources by the end of the decade, enabling us to exceed state carbon reduction goals.

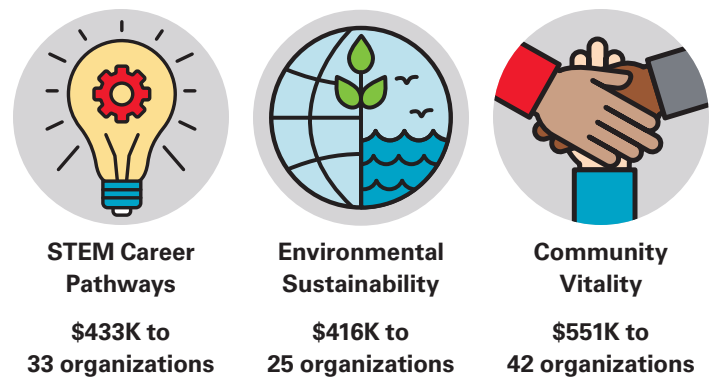

## STRENGTHENING COLORADO COMMUNITIES

We're committed to the communities we serve, and our employees donate their time and money to help keep our communities strong, diverse and vibrant.

\*from shareholder funds

In 2022, the Xcel Energy Foundation launched a new grant program, Energizing the Future, which strategically targets our foundation giving\* within three focus areas.
