

CITY OF SALIDA CLIMATE ACTION PLAN

According to the 2018 Salida Greenhouse-Gas (GHG) Inventory, the following sectors are responsible for a majority of total GHG production in the City:

TRANSPORTATION
32%

RESIDENTIAL
22%

COMMERCIAL
16%

SOLID WASTE
11%

WHY A CLIMATE ACTION PLAN?

To reduce greenhouse-gas production and help preserve the following:

Community health and well-being

Help reduce health threats like allergies, insect-borne diseases, and smoke-borne breathing difficulties.

Recreation and the environment

Protect the places our visitors and residents play, reduce the risk of mega-fires, and reduce flooding.

Economy and jobs

Create new green jobs by investing in energy efficiency, alternative energy sources and smart growth.
